

Week #3 Peer Review for Jackie Myers

Creating electronic grade book and items, drop box assignment and rubrics.

You have successfully created the grade book items and I could see the assessment details in each week's drop box assignment. I managed to go into the Quiz and answer the questions. I got my score as 3/5. I managed to attach a file in the drop box and email confirmation was sent. The rubric was also included in the drop box.

Quality Matters Evaluation

You mentioned a detailed explanation regarding Quality Matters Standard #3. I was very impressed with the way you have expressed the challenges and suggestions on implementing this standard.

LMS Tools Evaluations

This time you have explained the steps using video recording. This shows a clear mastery of the tools. The skills are above expectation. The LMS-2 (Canvas) videos for grading schemes, drop box, and rubric explanations were very clear and easy to follow. The way you have used the videos made your assignment less time consuming compared to using snapshots and explanations. I have started to link some You Tube in my assignment and found that it helps reduce the time in completing the assignment.

Overall, you have done a good job.
